In reply to your letter of September 27, 1946, I want to  
restate to you the following facts:-

- 1) It was and still is my intention to retain my New  
York City residence at 65 Morton Street, Apartment 6-I.
- 2) I do not have a legal residence in Ithaca where I am  
sojourning temporarily.

Re: Julie Bomber

Visited home in Knobelsdorff Village once. His wife, Olga, about 45 years. Do not recall when, where, or how. Visit to home was social. Believe he was with Joe Raw. Other old people were there. Knew him as casual acquaintance (the Rosendy's). Believe he just met him at union meeting (R. of Lab, Eng, Clem, & Fish).

Met him 2 to 3 times. Does not recall details of meetings. Displayed pp. of "olden book" containing Rosendy's name & address. No adequate answer as why there (names of several casual friends in book). Does not know when entry was made - but before he moved to Ithaca. Used to explain why Rosendy's last name under the R's (no explanation).

Believe his wife to not be Rosendy's. Related to wife taking convention on children. Does not know where or where. Was his practice to ship children.

However, no wife noted. Entry also was "C. Rosenthal (217 Linda - see 31581)". His stated to not be his first name to Ithaca - Ithaca lists his first of him in 19 C - that Rosenthal (Rosa Betty, lumber). Could not explain why Ithaca as name - Only reason for possibly putting name in entry after moving to Ithaca - was for purpose of reading Antenna card. Entry made in 19 C - possibly because of name however.

Re: Captain - Name unfamiliar. Left & telephone entries. Believe he called her when moving (as perhaps left in her name) & paid by Pearl.

Re: William Perone - does not know. Knew him & wife at 63 Morton St - name does not mean anything.

R. Wife Louise J. Ross  
R. Wife <sup>Louise J. Ross</sup> lived in Washington prior to NYC & also in Newark for a short time. Employed & not known - also attended college at Cleveland or Cincinnati.

300 JOURNAL

We have made a number of fundamental experiments, trying to establish satisfactorily the practicability of our system as stated in our original letter to you dated March 14, 1925; we have been unable to fabricate a model of this system, due to our inability to secure necessary laboratory and tool making equipment. With Navy Dept.'s permission, we will be able to proceed at once, with the development of this model.

...and your object after recording, file notes, shifts of light, if admitted at all, & the pulse from it's source will be relatively negligible. It is difficult to be of sufficient mind to be of the order of magnitude of the deviation produced by the audio signal, but this calculation index, if not too high, file down not often, but to a reasonable number.
